

Our annual installation targets for the rollout of smart meters 2025

From January 2022, suppliers must comply with a regulatory framework for the rollout of smart meters as defined by Department for Energy and Net Zero [DESNZ] which includes publishing our targets and performance for each rollout year.

2025 - Targets

Utility – Gas or Electric	Reporting Period Start	Reporting Period End	Calculated Planned Annual Target for Rollout Year Four (2025)
Gas	01/01/2025	31/12/2025	0
Electric	01/01/2025	31/12/2025	0

Our performance for the rollout of smart meters 2024

From January 2022, suppliers must comply with a regulatory framework for the rollout of smart meters as defined by Department for Energy and Net Zero [DESNZ] which includes publishing our targets and performance for each rollout year.

2024 - Performance

Utility – Gas or Electric	Reporting Period	Target	Installed	Target Met
Gas	2024	0	1013	Yes

- **Calculated Planned Annual Target [Gas]** our target for 2024 had already been achieved due to the installation of Qualifying Metering Systems prior to January 2022. However, we continued to roll out smart metering systems for our Gas Customers installing a further 1013 during the year.

Utility – Gas or Electric	Reporting Period	Target	Installed	Target Met
Electric	2024	25	40	Yes

- **Calculated Planned Annual Target [Power]** Our target for 2024 was met.
